PROFESSIONAL SUMMARY

Third-year Computer Science student with strong foundations in software engineering, distributed systems, and cybersecurity. Experienced in building full-stack web applications, automation tools, and intelligent systems using Python and modern development frameworks. Passionate about scalable systems, secure coding, and solving real-world problems through technology.

EDUCATION

Bachelor of Science in Computer Science
Karatina University, Kenya
Expected Graduation: 2026

Relevant Coursework:

- Data Structures & Algorithms
- Distributed Systems
- Software Engineering
- Artificial Intelligence
- Database Systems
- Cloud Computing
- Cybersecurity

TECHNICAL SKILLS

Programming Languages:
Python, Java, SQL, JavaScript, HTML, CSS

Frameworks & Tools:
Django, Git, Linux (Kali), Docker (basic), REST APIs

Cybersecurity Tools:
Nmap, Wireshark

Concepts:
Object-Oriented Programming, REST Architecture, MVC Design, System Design Basics, Networking Fundamentals

---

PROJECTS

- **Cybersecurity Threat Detection Agent**
  - Designed a Python-based agent to monitor and analyze suspicious network patterns.
  - Implemented rule-based detection logic for anomaly identification.
  - Strengthened understanding of network traffic analysis and intrusion detection concepts.
- **Binance Trading Bot**
  - Developed an automated trading bot integrating with exchange APIs.
  - Implemented trading logic, position management, and risk controls.
  - Focused on performance optimization and structured logging.
- **Expert System for Loan Approval**
  - Built an AI-based decision-support system using search techniques.
  - Applied rule-based reasoning to simulate financial approval logic.
  - Demonstrated structured problem modeling and system validation.
- **Django Portfolio Website**
  - Converted static HTML templates into dynamic Django templates.
  - Implemented reusable components and routing structure.
  - Applied MVC principles and database integration.

EXPERIENCE

Academic & Independent Development Projects

- Designed and implemented complete software solutions from requirements gathering to testing.
- Practiced version control using Git for collaborative and individual projects.
- Conducted penetration testing exercises through CTF-style challenges to strengthen secure coding practices.

LEADERSHIP & INITIATIVE

- Designed a structured cybersecurity learning roadmap to help peers understand security tools and concepts.
- Actively explore offensive security and system hardening techniques.
- Regularly practice problem-solving via algorithm challenges and system simulations.

KEY STRENGTHS

- Strong analytical and debugging skills
- Fast learner with high adaptability
- Structured problem-solving mindset
- Attention to security and performance
- Team-oriented with good communication skills
