PROFESSIONAL SUMMARY

Third-year Computer Science student with strong foundations in software engineering, distributed systems, and cybersecurity. Experienced in building full-stack web applications, automation tools, and intelligent systems using Python and modern development frameworks. Passionate about scalable systems, secure coding, and solving real-world problems through technology.

EDUCATION

Bachelor of Science in Computer Science

Karatina University, Kenya
Expected Graduation: 2026

Relevant Coursework:

- Data Structures & Algorithms
 - Distributed Systems
 - Software Engineering
 - Artificial Intelligence
 - Database Systems
 - Cloud Computing
 - Cybersecurity
-

TECHNICAL SKILLS

Programming Languages:

Python, Java, SQL, JavaScript, HTML, CSS

Frameworks & Tools:

Django, Git, Linux (Kali), Docker (basic), REST APIs

Cybersecurity Tools:

Nmap, Wireshark

Concepts:

Object-Oriented Programming, REST Architecture, MVC Design, System Design Basics, Networking Fundamentals

PROJECTS**◆ Cybersecurity Threat Detection Agent**

- Designed a Python-based agent to monitor and analyze suspicious network patterns.
- Implemented rule-based detection logic for anomaly identification.
- Strengthened understanding of network traffic analysis and intrusion detection concepts.

◆ Binance Trading Bot

- Developed an automated trading bot integrating with exchange APIs.
- Implemented trading logic, position management, and risk controls.
- Focused on performance optimization and structured logging.

◆ Expert System for Loan Approval

- Built an AI-based decision-support system using search techniques.
- Applied rule-based reasoning to simulate financial approval logic.
- Demonstrated structured problem modeling and system validation.

◆ Django Portfolio Website

- Converted static HTML templates into dynamic Django templates.
 - Implemented reusable components and routing structure.
 - Applied MVC principles and database integration.
-

EXPERIENCE

Academic & Independent Development Projects

- Designed and implemented complete software solutions from requirements gathering to testing.
 - Practiced version control using Git for collaborative and individual projects.
 - Conducted penetration testing exercises through CTF-style challenges to strengthen secure coding practices.
-

LEADERSHIP & INITIATIVE

- Designed a structured cybersecurity learning roadmap to help peers understand security tools and concepts.
 - Actively explore offensive security and system hardening techniques.
 - Regularly practice problem-solving via algorithm challenges and system simulations.
-

KEY STRENGTHS

- Strong analytical and debugging skills
 - Fast learner with high adaptability
 - Structured problem-solving mindset
 - Attention to security and performance
 - Team-oriented with good communication skills
-
